

# HYD1

Series Molded Case Circuit Breaker (Motor Circuit Breaker)

## I. Scope of Application

The HYD1 Series Molded Case Circuit Breaker (hereinafter referred to as "circuit breaker") is suitable for the circuits with AC voltage up to 690 V, rated frequency of 50 Hz and rated current of 0.1 A to 80 A. It is used for overload, phase failure, short circuit protection and infrequent starting control of three-phase squirrel-cage motors, distribution line protection and infrequent load conversion, and isolation.

This product complies with the requirements of GB/T 14048.2, GB/T14048.4, IEC 60947-2, and IEC60947-4-1.

## II. Model Description

HYD1-25 7-10A

The setting current is shown in the following table

Shell frame current: 25, 80

Model code of Molded Case Circuit Breaker

## III. Normal Operating Conditions

1. The altitude of the installation location shall not exceed 2,000 m in general.
2. The ambient air temperature shall not be lower than -5°C or higher than +40°C.
3. The relative air humidity shall not exceed 50% at the temperature of +40°C. The average minimum temperature of the wettest month shall not exceed +25°C, and the average maximum relative humidity of that month shall not exceed 90%.
4. The contamination grade of the surrounding environment is Grade 3.
5. The installation categories are II and III (load level and power distribution level).
6. The inclination between the installation surface and the vertical plane shall not be more than ±5°.
7. Rated working system: uninterrupted working system.

## IV. Main Technical Parameters

Operating environment	~5°C~+40°C				
Rated impact withstand voltage (kV)	6				
Rated insulation voltage Ui (V)	690				
Rated working voltage (V)	230(240)	400(415)	440	500	690
Rated frequency (Hz)	50				
Shell frame level current (A)	25, 80				
IP level	IP20				
Short circuit protection	Provided				
Isolation function	Provided				
Temperature compensation function	Provided				
Phase failure protection function	Provided

19	80	56 - 80	—	37	55

## VIII. Overcurrent Protection Characteristics

Operation characteristics of the circuit breaker during load balance of each phase

### 1. In power distribution load circuit

Serial number	Circuit breaker for power distribution			Ambient air temperature
	Set current multiple	Operating time	Initial state	
1	1.05 In	Non-operating within 1 hour	Cold state starting	+40°C±2°C
2	1.3 In	Operating within 1 hour	Proceeding in sequence 1	+40°C±2°C
3	10 In	Operating within 0.2 s	Cold state starting	Any suitable temperature

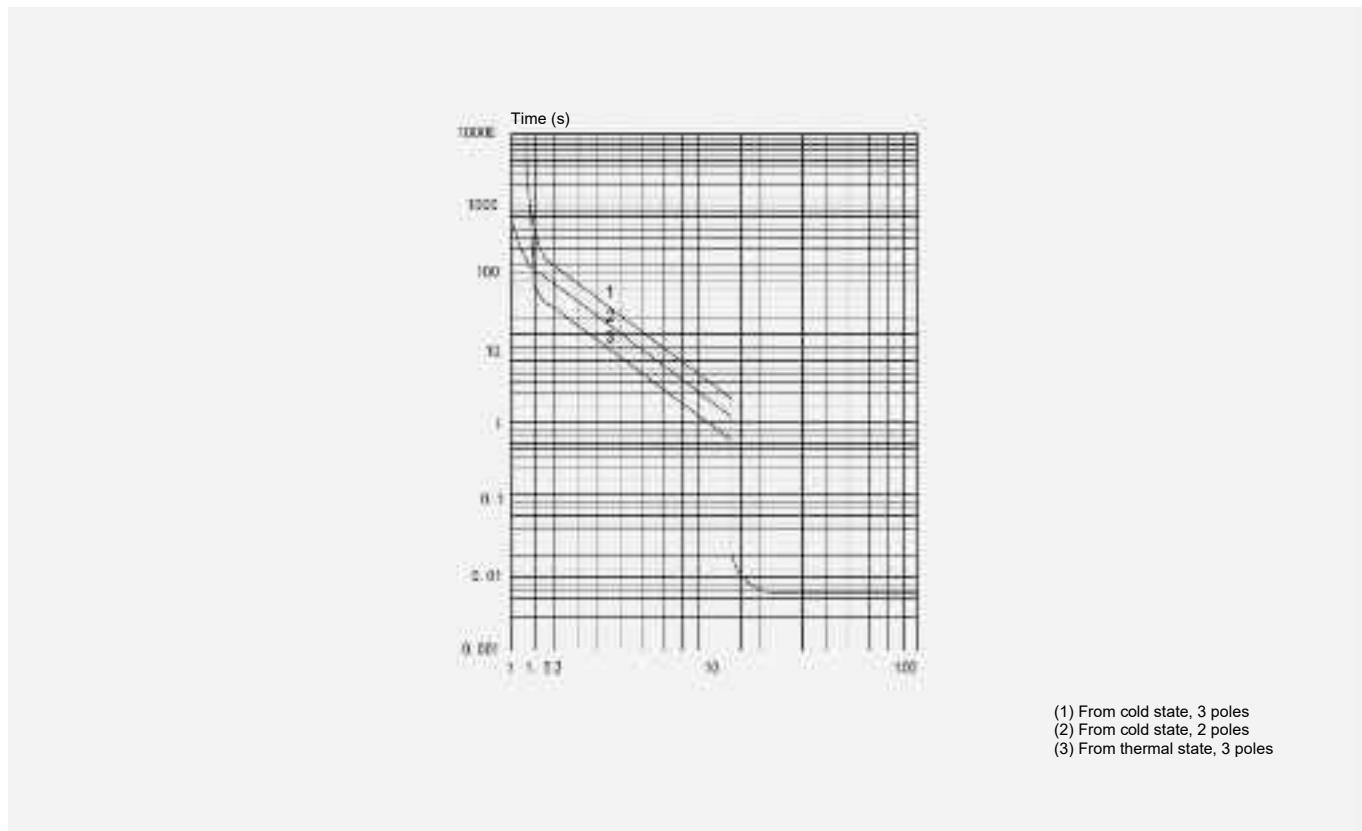

### 2. In motor load circuit

Serial number	Circuit breaker for motor protection			Ambient air temperature
	Set current multiple	Operating time	Initial state	
1	1.05 In	Non-operating within 2 hours	Cold state starting	+40°C±2°C
2	1.2 In	Operating within 2 hours	Proceeding in sequence 1	+40°C±2°C
3	1.5 In	Operating within 3 minutes	Starting after the current in sequence 1 reaches thermal balance	+40°C±2°C
4	7.5 In	Operating within 2 ~ 10 s	Cold state starting	+40°C±2°C
5	12 In	Operating within 0.2 s	Cold state starting	Any suitable temperature
